

## SUPPLIER LASER DIODE STACKS 808nm

## Three high-power MOSFET modules are shown, each mounted in a copper heat sink. The modules are connected to red and black power leads. The leftmost module has a label that reads "REV-A 1000W 214401". The middle module has a label that reads "1000W 214401". The rightmost module has a label that reads "1000W 214401". The modules are arranged in a row, and the power leads are connected to the top of each module.
